## Business Summary

CoroWare, Inc. operates as a software and software professional services company with a focus on information technology (IT) and robotics integration, business automation solutions, and unmanned systems solutions in North America and Europe. It involves in the deployment and integration of computing platforms and applications, as well as the development of unmanned vehicle software and solutions for customers in the research, commercial, and homeland security market segments. The company provides release management, software systems development, and product integration services that help Microsoft employees and departments to deliver quality products, solutions, and services. It also offers various enterprise business solutions, including service oriented business applications, knowledge management and collaboration portals, and delivering solutions around a set of Microsoft products. In addition, CoroWare provides product realization, robotics simulation, systems architecture and design, and robotic applications development services; and CoroBot, a mobile robot for researchers, hobbyists, and developers in the industrial and service robot segments. The company was founded in 2003. It was formerly known as Innova Robotics & Automation, Inc. and changed its name to CoroWare, Inc. in May 2008. The company was founded in 1994 and is based in Redmond, Washington.

With the exception of historical information, this document may include forward-looking statements that involve a number of risks and uncertainties. Actual results could differ materially from those anticipated as a result of various risks. There are numerous factors that could contribute to such differences, therefore such projected events and anticipated results are not warranties or guaranties that such events will occur or that the Company will achieve such results. For more information about this corporation and risks involved in the investment of their publicly traded shares, please see the company's website(s), and/or documents filed with the SEC, which are easily accessible in the EDGAR database system.
